PROFESSIONAL SUMMARY

Results-driven Android Developer with 6+ years of hands-on experience in designing, developing, and maintaining Android applications using Kotlin, Java, and modern Android frameworks. Proven expertise in writing clean, scalable code, implementing secure data solutions, and collaborating across agile teams. Adept at utilizing tools like Firebase, Hilt, and RESTful APIs, with a solid grasp of MVVM architecture and modern UI/UX principles. Passionate about building user-friendly, high-performance mobile applications.

SKILLS

Technical Skills	Android, Core Java/Kotlin, Unit Testing, Coroutines, RESTful APIs, Firebase, Hilt Jetpack Compose, React-Native
Design Patterns	MVC, MVP, MVVM, Clean Architecture
Tools and Libraries	Git, Jira, Gitlab, Bitbucket
OS and Software	Windows, Linux, MacOS, Android Studio, VsCode
Professional Skills	Requirements gathering, Scope definition ,Team-oriented approach Continuous process evaluation

WORK EXPERIENCE

Cognizant Technologies Gurugram, Haryana
Associates-Projects *Nov 2023 - Present*

- Develop scalable Android apps using Kotlin and Java following MVVM architecture.
- Conduct code reviews and enforce clean coding standards.
- Improved build performance by modularizing app components.

Tech Mahindra Noida, UP
Software Engineer *Aug 2021 - Sept 2023*

- Developed reusable modules and integrated Dynatrace and Adobe Omniture for analytics.
- Collaborated with cross-functional teams in an agile environment to deliver stable app releases.
- Enhanced accessibility (TalkBack) for visually impaired users.

iSkylar Technologies Jaipur, Raj
Android Developer *Jun 2020 - Aug 2021*

- Developed application modules based on design specifications, and handled bug fixes and root cause analysis.
- Implemented guest checkout and multilingual support (5 languages) in e-commerce apps.
- Wrote unit tests to ensure application stability, performance, and reliability.

Protocloud Technologies Jaipur, Raj
Android Developer and Trainee *Apr 2019 - Dec 2019 - Mar 2020*

- Translated UI/UX wireframes into responsive and high-performance Android code.
- Worked with Android components including intents, location services, and activity lifecycle.
- Worked on the layout like a constraint, relative, and linear layout.

PROJECTS

(FPL - Next Era Energy) The FPL app makes managing your electricity account fast, simple, and secure — right from your mobile device. With instant fingerprint access, you can view and pay your bill, track your energy usage, and receive real-time alerts and outage updates. Stay informed about your power and keep control of your energy anytime, anywhere.

(Kaiser Permanente) The Kaiser Permanente app offers a seamless and convenient way to manage your healthcare needs from your mobile device. For medication management, the app allows you to fill or refill most prescriptions with just a few taps. You can also check the status of your prescription orders and view a complete list of your medications, ensuring you stay on top of your treatments.

(Bell Canada) Bell is Canada's largest telecommunications company, providing Mobile phone, TV, high speed and wireless Internet, and residential Home phone services. I have worked on the Add a Line section which users can buy a new phone or bring their own phone with a new E-SIM or SIM.

(Original Marines) Original Marines is an Italy Based E-commerce Based Store which is operating in 30 countries around the world. Worked on the integration of 5 languages in the app. Build a feature that you can add multiple items to a cart with just one click.

EDUCATION

Bachelor of Technology, Amity University Rajasthan   2015 - 2019
Computer Science.

ACHIEVEMENTS

 Runner-UP, Unisys Hackathon 20/20 (Powered by HackerEarth) in 2017
